

SAFETY DATA SHEET	Page	2
	Revision	01
BELCEM WP SLURRY LIQUID	Date	July 2012
	Supersedes	00

1) Identification of the Product and Company

Product : **BELCEM WP SLURRY LIQUID**

Company : Manewtech-Belle Sdn. Bhd
29 & 31, Jalan TIAJ 2/1, Taman Industri Alam Jaya, 42300 Bandar Puncak Alam, Selangor
Tel : 603 - 6038 9084 / 9094 / 9497 / 9498 Fax : 603 - 6038 8684

2) Composition / information on ingredients

Chemical nature : Co-polymer dispersion

3) Possible hazards

Critical hazard to man and the environment: None

4) First aid measures

General advice : remove contaminated clothing
If inhaled : keep patient calm, remove to fresh air, seek medical attention.
On skin contact : wash thoroughly with soap and water
On contact with eyes : wash affected eyes for at least 15 minutes under running water with eyelids held open, consult an eye specialist.
On ingestion : immediately rinse mouth and then drink plenty of water, seek medical attention

5) Fire fighting measures

The product is an aqueous dispersion and is not combustible and non-flammable. However, dried latex will burn producing carbon dioxide accompanied by dense black smoke.
Suitable extinguishing media : water spray, dry extinguishing media, foam, carbon dioxide (CO₂)

6) Accidental release measures

Large spillages should be pumped into containers; soak up remainder with absorbent material.
Small spillages can be swilled away with water. Waste water must be disposed of correctly.

7) Handling and storage

Advice on safe handling : no special measures necessary with normal safety handling practice.
Storage : store in dry and cold place but should be protected against freezing or expose to direct sunlight.

8) Exposure controls and personal protection

Protective equipment : normal protective clothing, e.g. gloves and overalls, are usually adequate. Safety glasses are recommended.
Ventilation : normal conditions of ventilation are usually adequate.
Respiratory protection : respiratory equipment is not required unless handling the product in an enclosed area. The product contains low levels of volatile organic compounds, which may evaporate during application. Also a small quantity of ammonia has to be considered.

9) Physical and chemical properties

Form	: slightly viscous liquid
Colour	: white
Solidification temperature	: 0 °C (water)
Boiling point	: 100 °C (water)
Fash point	: not applicable
Flammability	: not applicable
Explosion hazard	: not applicable
Density (25 °C)	: approx. 1.00g/cm ³
Soluble in water	: miscible
pH value	: Alkaline

10) Stability and reactivity

The product is stable under recommended storage conditions.

11) Toxicological information

According to information available to us the product is not harmful to health provided it is properly handled under industrial conditions.

12) Ecological information

The product is not classified as dangerous to the environment. However the product can be attacked by bacteria, it is harmful to fish and aquatic life and do not discharge the product into natural waterways without pre-treatment (biological treatment plant).

13) Disposal considerations

Disposal of the product solid waste and packaging should always comply with Local regulations.

14) Transport information

The product is not classified as hazardous under transport regulations.

15) Regulatory information

According to the data available to us, the product is not hazardous. However it should be handled in accordance with good industrial hygiene and safety practice.

16) Other information

The information given here is based on the present state of our knowledge and is provided solely for making safety assessments. This safety data sheet should be used in conjunction with the product data sheet. Other relevant laws and regulations should be observed by the product user.
